Art Unit: 3732

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 28, line 4, the term "the adapter piece" lacks prior antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3,5-12,15,18-20,30,35-42 rejected under 35 U.S.C. 102(e) as being anticipated by Laporte (6,286,518).

With respect to claim 1, Laporte discloses a device (1) for applying a substance to the hair, the device comprising an applicator portion (3) and a receptacle (2) on which the applicator portion is fixed, the receptacle being suitable for containing the substance to be applied, the applicator portion having at least one delivery orifice (7) enabling the substance to be delivered, wherein the applicator portion has teeth (5,6) arranged around a closed curve, the gap between the teeth being such that they allow hairs to

Art Unit: 3732

pass between the teeth while enabling the substance to be retained within the curve; as set forth in column 3, lines 10-20.

With respect to claims 2-3,5-12,15,18-20,30-35-42, Laporte discloses all the limitations, as set forth in columns 2-3, lines 1-67; and as best seen in FIGS.1-4.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 33,34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laporte (6,286,518) in view of Diaz (5,937,864).

With respect to claims 33,34, it is noted that Laporte did not teach of an applicator wherein the receptacle includes a removable cap at an end opposite from the applicator portion; as claimed by applicant. However, in a similar art, Diaz evidences the use of a device having a cap at an end opposite from the applicator portion for preventing the removal of the liquid and to stand on the plane surface.

Therefore, given the teaching of Diaz, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a cap in the device of Laporte, as taught by Diaz for preventing the removal of the liquid and to be able to stand the device on a plane surface.

Art Unit: 3732

Allowable Subject Matter

Claims 4,13,14,16,17,2 -29,31,32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
